

SUMIT KUMAR

Glasgow, UK | sumitmorgan0111@gmail.com | +44 7404 807828

PROFESSIONAL SUMMARY

Frontend Engineer with experience in React, TypeScript, and Node.js for large-scale fintech and banking applications, including Open Banking systems, payments microservices, and fraud prevention platforms. Strong in building reusable component libraries, REST API integration, CI/CD pipelines, and Agile delivery. Currently advancing expertise through MSc Computing Science at the University of Glasgow, and hands-on AI engineering coursework in LLM systems, RAG pipelines, and agentic workflows.

EDUCATION

MSc Computing Science | University of Glasgow (Russell Group), UK

Core Modules: Programming for AI, Software Engineering, Algorithms & Data Structures, Internet Technology, Human-Computer Interaction

BTech Electronics & Instrumentation Engineering | SRM University, Chennai, India

CORE TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Salt-DS, AG Grid, Highcharts, React Hook Form, WebSocket

Backend: Node.js, REST APIs, GraphQL, Microservices, MongoDB, PostgreSQL, SQL

Testing: Jest, React Testing Library, TDD, BDD, End-to-End Testing, Unit & Integration Testing

Cloud & DevOps: AWS (Certified Cloud Practitioner), Docker, CI/CD Pipelines, Git, GitHub Actions

Tools & Practices: Figma, Jira, Agile/Scrum, Sprint Planning, Code Reviews, Clean Code, Splunk

AI & ML: Python, RAG Pipelines, LLM Integration, LangChain, Vector Databases, MCP Agents

PROFESSIONAL EXPERIENCE

Senior Engineer | Wipro Digital / Lloyds Banking Group | London, UK

- Developed and integrated Node.js microservices for Bulk and Batch payments within Lloyds Open Banking platform, enabling regulated third-party provider (TPP) access for multiple business accounts
- Developed API-driven backend services across PFFC platforms including FASP (Fraud & Auth), CCTM (Cross-Channel Transaction Monitoring), and Pindrop telephonic banking, supporting real-time fraud prevention at scale
- Supported FATCA/CRS compliance systems to monitor and restrict transactions involving sanctioned entities, ensuring full regulatory adherence across international banking operations
- Provided production support via problem records, change management, and live incident resolution across all platforms, maintaining 99.9%+ system uptime

Software Engineer | Wipro Digital | Bangalore, India

- Built search-based dashboards and multi-page React and Angular applications from scratch, integrating with .NET backend APIs to serve 50K+ daily active users
- Developed ZYNLA, a full-stack collaborative platform using React and Node.js with RESTful APIs across multiple modules, supporting real-time user interactions
- Partnered with QA teams during bug-fix cycles to proactively identify edge cases, reducing production defect rates by ~25% across multiple release cycles

AI ENGINEERING PROJECTS

Commodity RAG Pipeline

- Built end-to-end production RAG pipeline using LangChain, Groq (LLaMA-3.3-70b), HuggingFace embeddings (all-MiniLM-L6-v2), and ChromaDB vector store over World Bank commodity PDFs (603 chunks)
- Implemented Agentic RAG as base architecture with Corrective RAG as quality layer; added source attribution and confidence scoring for financial document Q&A

CommodEx | AI-Powered Price Intelligence Platform | MSc Dissertation Project

- Agentic AI platform targeting UK industrial SMEs for commodity price discovery and counterparty matching
- Architecture stack: Agentic RAG + Corrective RAG, FastAPI microservices, LangChain orchestration, vector search, monitoring with Splunk and Dynatrace

FX Exchange Trading Dashboard | Live: <https://fxexchange.netlify.app>

- Full-stack trading simulator: React/TypeScript frontend + Django REST API + PostgreSQL, with real-time rate polling, AG Grid trade history, Highcharts price charts, portfolio tracking, and CSV export, 750+ tests

GitHub: https://github.com/sumit-gla-uog/FXExchange_frontend

CERTIFICATIONS

AWS Certified Cloud Practitioner | MERN Stack Certification
